Story 1: Product SearSearch Input									
Test Scenario ID	Test Scenario Description	Test Case ID	Test Case Description	Test Steps	Preconditions	Test data	Expected result	Actual result	Status
TS_01	Verify user can search for products using keyword search from any page	TS_01_TC_01	Search for product using valid keyword from homepage	1. Navigate to homepage	User is on the homepage	Keyword = 'wireless headphones'	A list of relevant products matching the keyword should be displayed immediately		Not Tested
				2. Locate search bar					
				3. Type valid keyword					
				4. Press Enter / click search icon					
				5. Review results list					
		TS_01_TC_02	Search for product using valid keyword from a non-home page	1. Navigate to any page other than homepage	User is on a page other than the homepage	Keyword = 'running shoes'	A list of relevant products matching the keyword should be displayed immediately, regardless of originating page		Not Tested
				2. Locate search bar in header					
				3. Type valid keyword					
				4. Press Enter / click search icon					
				5. Review results list					
		TS_01_TC_03	Search using a partial keyword and verify relevant results appear quickly	1. Navigate to any page	Products containing the partial keyword exist in catalog	Keyword = 'lap'	Relevant products (e.g. laptops, laptop bags) should be displayed without noticeable delay		Not Tested
				2. Type partial keyword					
				3. Press Enter / click search icon					
				4. Review results list and response time					
		TC_PS_02_01	Filter search results by price range only	1. Perform a product search with a valid keyword	Search has returned products with varying prices	Keyword = 'shoes'; Price range = \$20-\$50	Only products priced within \$20-\$50 should be displayed		Not Tested
				2. Open filter panel					
				3. Set minimum and maximum price range					
				4. Apply filter					
				5. Review filtered results					
		TC_PS_02_02	Filter search results by category only	1. Perform search	Search results contain products from multiple categories	Keyword = 'phone case'; Category = 'Electronics'	Only products belonging to the 'Electronics' category should be displayed		Not Tested
				2. Open filter panel					
				3. Select category					
				4. Apply filter					
				5. Review results					

TS_02	Verify user can filter search results by price range, category, and average rating	TC_PS_02_03	Filter search results by average rating only	1. Perform search	Search results contain products with varying ratings	Keyword = 'blender'; Minimum rating = 4 stars	Only products with an average rating of 4 stars or higher should be displayed		Not Tested
				2. Open filter panel					
				3. Select minimum rating					
				4. Apply filter					
				5. Review results					
		TC_PS_02_04	Apply combined filters (price range + category + rating) simultaneously	1. Perform search	Search results contain varying combinations of price, category, rating	Keyword = 'watch'; Price = \$50-\$150	Only products satisfying all three filter conditions simultaneously should be displayed		Not Tested
				2. Open filter panel					
				3. Set price range		Category = 'Accessories'			
				4. Select category		Rating = 3 stars & up			
		TC_PS_02_05	Remove/clear applied filters and verify results revert to the full unfiltered list	5. Select minimum rating	At least one filter is currently applied	Previously applied filter = Category 'Electronics'	All originally matching search results should be displayed again without filter		Not Tested
				6. Apply all filters					
				7. Review results					
TS_03	Verify system displays a clear 'No results found' message when no matches exist	TC_PS_03_01	Search for a keyword with no matching products in catalog	1. Navigate to any page	No product in the catalog matches the entered keyword	Keyword = 'xyzunknownproduct123'	A clear 'No results found' message should be displayed to the user		Not Tested
				2. Type keyword with no matching products					
				3. Press Enter / click search icon					
		TC_PS_03_02	Apply filters that eliminate all search results	1. Perform a valid product search	Search initially returns results before filters are applied	Keyword = 'socks'; Price range = \$10,000-\$20,000	A clear 'No results found' message should be displayed after filters are applied		Not Tested
				2. Apply filter combination that no product satisfies					
				3. Review results					
		TC_PS_03_03	Search with an empty/blank search term	1. Navigate to any page	Search bar is empty	Keyword = '' (empty)	System should display 'No results found' or a validation prompt requesting keyword		Not Tested
				2. Leave search bar empty					
				3. Press Enter / click search icon					

Story 2: Guest Checkout Option									
Test Scenario ID	Test Scenario Description	Test Case ID	Test Case Description	Test Steps	Preconditions	Test data	Expected result	Actual result	Status
TS_GC_01	Verify user can checkout as guest without being forced to log in or register & successfully complete a purchase by providing email, shipping destination, and payment details	TC_GC_01_01	Select 'Checkout as Guest' option from cart page	1. Add product(s) to cart	User is not logged in; cart contains at least one item	Cart with 1 item; no user account/session	User should proceed to checkout as a guest without being redirected to login/register page		Not Tested
				2. Navigate to cart page					
				3. Click 'Checkout'					
				4. Verify 'Checkout as Guest' option is visible					
				5. Select 'Checkout as Guest'					
		TC_GC_01_02	Complete guest purchase with valid email, shipping address, and payment details	1. Select 'Checkout as Guest'	Guest checkout selected; cart contains at least one item	Email = 'guest@example.com'	Order should be placed successfully and an order confirmation should be displayed		Not Tested
				2. Enter valid email address		Shipping = valid address			
				3. Enter valid shipping destination		Payment = valid card details			
				4. Enter valid payment details					
				5. Submit order					
		TC_GC_03_01	Attempt guest checkout with invalid email format	1. Select 'Checkout as Guest'	Guest checkout selected	Email = 'guestexample.com' (invalid format)	System should display a validation error for invalid email format and prevent order submission		Not Tested
				2. Enter invalid email format					
				3. Enter valid shipping and payment details					
				4. Submit order					

TS_GC_03	Verify system validates guest checkout inputs and displays appropriate errors for invalid data	TC_GC_03_02	Attempt guest checkout with missing/empty shipping address fields	1. Select 'Checkout as Guest'	Guest checkout selected	Shipping address = empty	System should display a validation error requiring shipping details and prevent order submission		Not Tested
				2. Enter valid email					
				3. Leave shipping address fields empty					
				4. Enter valid payment details					
				5. Submit order					
		TC_GC_03_03	Attempt guest checkout with invalid/declined payment details	1. Select 'Checkout as Guest'	Guest checkout selected	Payment card = invalid/declined test card number	System should display a payment error message and prevent order completion		Not Tested
				2. Enter valid email and shipping address					
				3. Enter invalid card number / declined test card					
		TC_GC_03_04	Attempt guest checkout with all required fields empty	4. Submit order	Guest checkout selected	Email, shipping, payment = empty	System should display validation errors for all missing required fields and prevent order submission		Not Tested
				1. Select 'Checkout as Guest'					
				2. Leave email, shipping, and payment fields empty					
TS_GC_04	Verify guest receives order confirmation and digital receipt at the provided email address	TC_GC_04_01	Verify confirmation is displayed and email is triggered immediately after successful guest order	3. Submit order	Guest checkout order placed successfully	Email = 'guest@example.com'	On-screen order confirmation should display immediately, and a confirmation/receipt email should be sent to 'guest@example.com'		Not Tested
				1. Complete a guest checkout successfully					
				2. Observe on-screen confirmation message					
		TC_GC_04_03	Verify digital receipt contains accurate order details	3. Check inbox of provided email address	Guest checkout order placed successfully; confirmation email received	Order placed with 2 items, total \$45.99, shipping to valid address	Receipt email should accurately reflect order number, purchased items, total price, and shipping destination		Not Tested
				1. Complete guest checkout					
				2. Open received receipt email					
				3. Verify order number, item(s), price, and shipping details match the order placed					

Story 3: Verified Customer Reviews

Test Scenario ID	Test Scenario Description	Test Case ID	Test Case Description	Test Steps	Preconditions	Test data	Expected Result	Actual Result	Status
TS_REV_01	Verify logged-in user can submit a star rating and written review for a product they have purchased.	TC_REV_01_01	Submit review with 5-star rating and written text for a purchased product.	1. Login as a registered user.	User is logged in and has purchased the product being reviewed.	Rating = 5 stars, Review text = 'Great product, highly recommend!', Product = previously purchased item.	Review should be submitted successfully and displayed on the product page.		Not Tested
				2. Navigate to the product page of a previously purchased item.					
				3. Click on the 'Write a Review' option.					
				4. Select 5-star rating.					
				5. Enter written review text.					
				6. Submit the review.					
				7. Check that the review appears under the product.					
		TC_REV_01_02	Submit review with a star rating only and no written text, where written text is optional.	1. Login as a registered user.	User is logged in, has purchased the product, and written review text is an optional field.	Rating = 3 stars, Review text = empty, Product = previously purchased item.	Review with star rating only should be submitted successfully.		Not Tested
				2. Navigate to the product page of a previously purchased item.					
				3. Click on the 'Write a Review' option.					
				4. Select 3-star rating.					
				5. Leave the written review field empty.					
				6. Submit the review.					
				7. Check that the review appears with rating only.					

TS_REV_02	Verify user can view the overall average star rating and total number of reviews displayed near the product title.	TC_REV_02_01	View aggregate rating for a product that has multiple existing reviews.	1. Login as a user (or browse as guest).	Product has at least one submitted review.	Product with 10 reviews averaging 4.2 stars.	Average star rating and total review count should be displayed prominently near the product title.		Not Tested
				2. Navigate to a product page that has multiple existing reviews.					
		TC_REV_02_02	View aggregate rating display for a product that has zero reviews.	3. Check the area near the product title for average rating and review count.					
TS_REV_03	Verify user is restricted from submitting a review for a product they have not purchased and sees an explanatory message.	TC_REV_03_01	Attempt to submit a review for a product not purchased by the logged-in user.	1. Login as a registered user.	User is logged in and has not purchased the product being viewed.	Product = item not present in user's purchase history.	System should restrict the review submission and display a message explaining that only verified purchasers can review the product.		Not Tested
				2. Navigate to the product page of an item never purchased.					
				3. Attempt to click the 'Write a Review' option.					
				4. Observe the system response.					
TS_REV_04	Verify system validates review submission and rejects invalid or unauthorized inputs.	TC_REV_04_01	Submit review with rating value below the allowed range.	1. Login as a registered user.	User is logged in and has purchased the product.	Rating = 0 (invalid, below allowed range of 1-5).	System should display an error indicating rating must be between 1 and 5 stars.		Not Tested
				2. Navigate to a purchased product page.					
				3. Attempt to submit review with rating value 0.					
				4. Observe the system response.					
		TC_REV_04_02	Submit review with rating value above the allowed range.	1. Login as a registered user.	User is logged in and has purchased the product.	Rating = 6 (invalid, above allowed range of 1-5).	System should display an error indicating rating must be between 1 and 5 stars.		Not Tested
				2. Navigate to a purchased product page.					
				3. Attempt to submit review with rating value 6.					
				4. Observe the system response.					
		TC_REV_04_03	Submit review with the required star rating field left empty.	1. Login as a registered user.	User is logged in and has purchased the product; star rating is a required field.	Rating = empty, Review text = 'Nice product'.	System should display an error requiring a star rating to be selected before submission.		Not Tested
				2. Navigate to a purchased product page.					
				3. Click 'Write a Review'.					
				4. Enter written review text but leave star rating unselected.					
		TC_REV_04_04	Attempt to submit a review while not logged in.	5. Submit the review.	User is not authenticated/logged in.	User session = unauthenticated.	System should redirect the user to login or display a message requiring login before submitting a review.		Not Tested
				6. Observe the system response.					
				1. Log out or browse as a guest.					
				2. Navigate to any product page.					
				3. Attempt to access the 'Write a Review' option.					
				4. Observe the system response.					

Story 4: Save to Wishlist									
Test Scenario ID	Test Scenario Description	Test Case ID	Test Case Description	Test Steps	Preconditions	Test data	Expected Result	Actual Result	Status
		TC_WL_01_01	Add a single product to wishlist using the heart/Add to Wishlist icon.	1. Login as a registered user.	User is logged in and product is not already in the wishlist.	Product = any available item, action = Add to Wishlist.	Product should be instantly saved to the user's wishlist and icon should reflect saved state.		Not Tested
				2. Navigate to any product page.					
				3. Click the heart or 'Add to Wishlist' icon.					
				4. Check the icon state and confirmation message.					

TS_WL_01	Verify logged-in user can add a product to their wishlist from the product page.	TC_WL_01_02	Add multiple different products to wishlist across separate product pages.	1. Login as a registered user. 2. Navigate to Product A page and click 'Add to Wishlist'. 3. Navigate to Product B page and click 'Add to Wishlist'. 4. Navigate to the Wishlist page. 5. Check that both products are listed.	User is logged in; Products A and B are not already in the wishlist.	Product A, Product B, action = Add to Wishlist for each.	Both products should appear in the user's wishlist.		Not Tested
		TC_WL_01_03	Attempt to add a product that is already saved in the wishlist.	1. Login as a registered user. 2. Navigate to a product page already saved in the wishlist. 3. Observe the icon state. 4. Click the icon again. 5. Check the wishlist for duplicate entries.	User is logged in and the product is already present in the wishlist.	Product = item already in wishlist.	Icon should indicate the item is already saved; clicking again should remove it from the wishlist (toggle behavior) without creating a duplicate entry.		Not Tested
TS_WL_02	Verify user can navigate to the Wishlist page and view saved items with their current prices.	TC_WL_02_01	View wishlist page containing previously saved items.	1. Login as a registered user with saved wishlist items. 2. Navigate to the account dashboard. 3. Click on the Wishlist section/page. 4. Check that all saved items are listed with current prices.	User is logged in and has one or more items saved in the wishlist.	Wishlist containing 3 saved products.	Wishlist page should display all saved items along with their current prices.		Not Tested
		TC_WL_02_02	View wishlist page when no items have been saved.	1. Login as a registered user with an empty wishlist. 2. Navigate to the account dashboard. 3. Click on the Wishlist section/page. 4. Observe the page content.	User is logged in and has not saved any items to the wishlist.	Wishlist = empty.	System should display a message indicating the wishlist is empty.		Not Tested
		TC_WL_02_03	Verify displayed price on wishlist reflects the current price, not the price at time of saving.	1. Login as a registered user who saved an item when its price was different. 2. Navigate to the Wishlist page. 3. Compare the displayed price to the product's current listed price.	User has a wishlist item whose price has changed since it was saved.	Product saved at \$50, current price now \$45.	Wishlist should display the product's current price (\$45), not the price at the time it was saved.		Not Tested
TS_WL_03	Verify user can move an item from the wishlist directly into the active shopping cart.	TC_WL_03_01	Move a single wishlist item to the shopping cart.	1. Login as a registered user with at least one saved wishlist item. 2. Navigate to the Wishlist page. 3. Click the 'Move to Cart' button next to the item. 4. Navigate to the shopping cart. 5. Check that the item appears in the cart.	User is logged in, has an item in the wishlist, and the item is in stock.	Product = in-stock item saved in wishlist.	Item should be added to the active shopping cart and ready for checkout.		Not Tested
		TC_WL_03_02	Verify item is removed from wishlist after being moved to the cart.	1. Login as a registered user with a saved wishlist item. 2. Navigate to the Wishlist page. 3. Click 'Move to Cart' for the item. 4. Return to the Wishlist page. 5. Check whether the item still appears in the wishlist.	User is logged in and has an item in the wishlist.	Product = in-stock item saved in wishlist.	Item should no longer appear in the wishlist after being moved to the cart.		Not Tested
		TC_WL_03_03	Move multiple wishlist items to the cart in a single session.	1. Login as a registered user with multiple saved wishlist items. 2. Navigate to the Wishlist page. 3. Click 'Move to Cart' for Item A. 4. Click 'Move to Cart' for Item B. 5. Navigate to the shopping cart. 6. Check that both items appear in the cart.	User is logged in and has at least two items saved in the wishlist.	Product A and Product B, both in stock.	Both items should be successfully transferred to the shopping cart.		Not Tested

TS_WL_04	Verify unauthenticated users are restricted from performing wishlist actions.	TC_WL_04_01	Attempt to add a product to wishlist without being logged in.	1. Log out or browse as a guest.	User is not authenticated/logged in.	User session = unauthenticated, Product = any item.	System should prompt the user to log in before the item can be saved to a wishlist.		Not Tested
				2. Navigate to any product page.					
				3. Click the heart or 'Add to Wishlist' icon.					
				4. Observe the system response.					
		TC_WL_04_02	Attempt to access the Wishlist page without being logged in.	1. Log out or browse as a guest.	User is not authenticated/logged in.	User session = unauthenticated.	System should redirect the user to the login page or display a message requiring authentication.		Not Tested
				2. Attempt to navigate directly to the Wishlist page URL/section.					
				3. Observe the system response.
